Career Objective

Computer Science undergraduate with hands-on experience in software and backend development through an industry internship and academic projects. Skilled in Python, SQL, JavaScript, Node.js, Angular, and REST APIs. Experienced in developing web applications, integrating APIs, and building AI-assisted solutions. Seeking an entry-level Software Developer or Full Stack Developer role to apply my technical and problem-solving skills.

Education

MVSR Engineering College, Hyderabad **2023–2027**
B.E. in Computer Science Engineering

Sri Chaitanya Junior College, Hyderabad **2021–2023**
Intermediate (MPC)

Chaitanya Central School, Mahabubnagar **2011–2021**
CBSE Board

Experience

Node.js Technology Intern – Instrutel Pvt. Ltd., Hyderabad **June 2026 – Present**

- Developed backend applications using Node.js with a focus on API development and real-time data processing.
- Designed and implemented responsive frontend interfaces using Angular for real-time engineering dashboards.
- Collaborated with the development team to build, test, and integrate full-stack application features in a real-world environment.

Projects

1. VOYAGE – Smart AI Itinerary Planner — React.js, Node.js, Gemini API 2025 – 2026

- Developed an AI-powered travel planner that generates personalized itineraries based on user preferences.
- Implemented features including trip planning, weather updates, and trip sharing using React.js and Node.js.
- Integrated Gemini API and OpenWeatherMap API for intelligent recommendations and real-time travel information.

2. Programming Quiz Application — JavaScript, Kotlin, Firebase 2025

- Developed a programming quiz application for C, C++, and Java concepts with interactive quiz levels.
- Implemented score tracking, result display, and user progress management using Firebase.
- Designed a simple and user-friendly interface using JavaScript and Kotlin.

3. AI-Assisted Knowledge Retrieval System — Angular, Ollama 2026

- Developed an Angular-based chatbot integrated with Ollama for organization-specific knowledge retrieval.
- Connected frontend components with backend APIs and designed responsive user interface components.

Technical Skills

Programming Languages: Python, SQL, C
Backend Technology: Node.js
Web Technologies: HTML, CSS, React.js, Angular
Tools: Google Workspace (Docs, Sheets, Gmail), Visual Studio Code, Git, GitHub, MuleSoft

Certifications

Java Full Stack Developer, Python Full Stack Developer – AICTE

Database Programming with SQL – Oracle Academy

Artificial Intelligence - Deep Learning – AIMER Society

Roles and Responsibilities

Technical and Team Activities

- Participated in technical projects and collaborative activities, improving teamwork, communication, and problem-solving skills.
- Managed creative projects, developing skills in design, planning, attention to detail, and customer interaction.

Achievements

Received Certificate of Merit for CSI Fusion paper presentation.

Completed industry internships at AIMERS and Instrutel Pvt. Ltd.

Participated in hackathons and technical events to enhance problem-solving skills.
